

Communicate anywhere™

Communicate anywhere™

NINA

SatComms Earth Station located at Henderson, Western Australia.

SatComms Australia is a specialist, world-class provider of mobile and fixed satellite solutions. We have a proud heritage of working together with our customers to ensure that the satellite solution delivered is a perfect fit for their immediate and future requirements. From basic handheld technology to fully-integrated satellite network solutions, SatComms is your partner of choice.

Originally established as a division of J.N. Taylor & Co. Pty Ltd (Taylor Marine) in Australia, SatComms quickly established itself as a leader in the provision of land, maritime and aeronautical satellite-based solutions to Australian and Global markets.

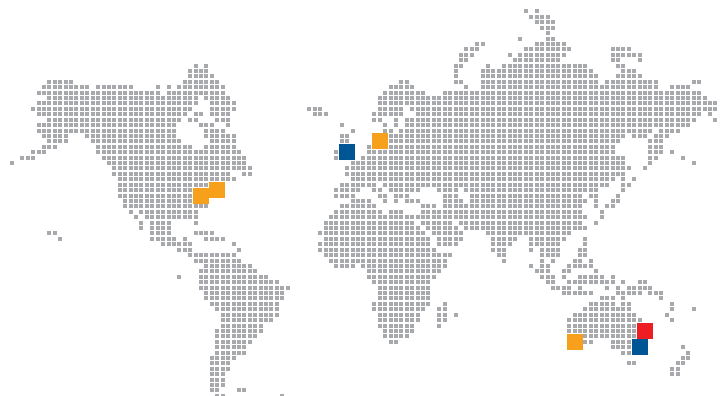

Founded on the solid foundations of a company which has enjoyed uninterrupted trading in Australia since 1887, SatComms has today grown to become a market leader in satellite communications with specialist staff and significant infrastructure assets backing up a highly professional approach to finding its customers the right solution, no matter what the requirement.

SatComms expertise is further supplemented by owning and operating its own network infrastructure, allowing the capability to seamlessly combine and deliver Inmarsat BGAN-based technologies with Ku & C-Band VSAT services, all via one global private network.

To complement our superior service provision, we also offer customers access to the latest range hardware and value-added applications available on the Inmarsat, Iridium and Thuraya networks. SatComms is headquartered in Queensland with a large technical operation in Henderson, Western Australia, supplementing offices around Australia and overseas.

SATCOMMS GLOBAL PRESENCE

■ Teleport + PoP ■ PoP ■ Head Office

Communicate anywhere satellite

SatComms has invested significantly in state-of-the-art infrastructure to assist clients to communicate from any point on the globe, to any point on the globe, at a level of performance and security to meet their applications' demands.

Teleport and Point of Presence (PoP):

SatComms owns and operates an Earth Station in Henderson, Western Australia. From this location, SatComms is able to Connect to global telecommunications partners, delivering customers' data & voice traffic with the level of security and performance required. The SatComms Teleport hosts customers' equipment and links remote sites to fibre and PSTN networks. This site also delivers Engineering & Support, along with the management of all customer networks end-to-end within the Network Operations Centre.

The Sydney PoP operates within the Global Switch facility at Ultimo. This enables the intelligent routing of IP Data traffic to be delivered to customer premises from any point in the world, to any point in the world without traversing the internet. Partners can also pick up their customers' traffic at this PoP and deliver the last mile connection under existing Service Level Agreements. This PoP is fully connected to SatComms' main site in Western Australia.

This infrastructure enables SatComms to offer a unique, single network entry/exit point for all communications, whether mobile L Band solutions, or Fixed Ku & C Band solutions. From anywhere - to anywhere.

with a SatComms® communication solution.

FIXED SATELLITE SERVICES (FSS)

SatComms offers Ku & C-Band VSAT services, with the ability to link customers to any point on the planet via infrastructure within Australia. These services offer true broadband data throughput speeds, and the ability for customers to utilise privately commissioned satellite bandwidth for greater performance and security.

Further, the company can offer these VSAT services within Europe, the Middle East and Africa via a Teleport in The Netherlands linked to SatComms' PoP. Beyond this, VSAT services in the Americas can also be linked via Teleports in the USA (Maryland & New York). Thus, SatComms can accommodate a very disparate and widespread network, linking customer's sites to Australia, USA, Canada, South Africa, Europe and beyond.

SatComms works with the customer on needs analysis at each remote location, along with various partner satellite operators to offer fit-for-purpose network designs.

MOBILE SATELLITE SERVICES (MSS)

SatComms has many years of experience in the area of Mobile Satellite Services. The company offers a wide range of products on the networks of Inmarsat, Iridium and Thuraya.

Through its Land Earth Station partnerships, SatComms is a leading provider of legacy Inmarsat networks (INM-C, D+, Mini-M, GAN M4, Fleet, Swift), and through the development of PoP infrastructure in Sydney, SatComms is now directly interconnected with Inmarsat's current I-4 constellation of satellites. This constellation offers Mobile IP services at speeds of up to 492kbps (Fleet Broadband, BGAN, Swift Broadband), as well as the new ISAT Phone Pro service – Inmarsat's first global handheld satellite phone.

SatComms is a proven provider of Iridium solutions, offering clients Handheld services, as well as bespoke tracking and data applications over the network.

On Land, At Sea and In the Air, SatComms assists its customers to Communicate anywhere.

SatComms Australia is a signatory to the Australian Government Telecommunications Act (AGTA) and as such is an experienced provider of world class satellite network access, support, equipment supply, as well as installation and provisioning services to the Australian Federal Government and State Government organisations.

Our Partners

SatComms partners with leading global industry organisations to deliver world class services to its clients throughout the globe.

Our partners include Globecom Systems, and its subsidiaries Carrier 2 Carrier Telecom BV and Evosat.

GLOBECOMM

SatComms Australia is currently the only Australian owned and operated Inmarsat PSA (Point of Service Activation) as well as being an Inmarsat ISP (Inmarsat Service Provider). SatComms local entity, operated via the Corporate Headquarters and Customer Service Centre located on the Sunshine Coast in Queensland, ensures that all matters including activations, support and account enquiries are able to be dealt with swiftly and efficiently, minimising activation and support response times.

Specific Service and Product Areas

Not only does SatComms provide quality service and low cost satellite air-time provision, we pride ourselves on our combined knowledge, allowing our Australian based staff to assist in matters 24/7 including, but not limited to:

- Terminal configuration, administration and maintenance;
- Network monitoring via distribution partners and Inmarsat;
- Fault diagnosis and rectification;
- Localised activation and service provision;
- Accounts analysis and advice; and
- Technical Support via telephone, email or fax.

Our business is communications
so it only makes sense that we're
very easy to communicate with.

We look forward to hearing
from you.
